

I reside in Austin TX & listen to K-LOVE on 92.1FM. There have been many different music venues on this frequency, none of which have lasted very long. K-LOVE is the finest quality music that has ever been on 92.1. It is a blessing and delivers a much needed message to our community. To have a place that not only my children, but many, many other families with children, can listen to that station and not have to be concerned that they will be subjected to bad language, by the DJ's and through the words and messages in the music. Kids are going to listen to the radio and if there is not a station with the acceptable kind of music and commentary they will listen to another. Music is a very powerful influence on people of all ages need to have a station to go to to receive the kind of music they enjoy. There are many stations that play music other than Christian. Please don't take away this station in our community. The loss to our town would be like taking the only light in a dark forest away. To me it would be so discouraging. The DJ's have become friends that I invite into my home each morning as I ready for work and stay with me throughout my day. There are people in our community who have not yet come across the station but will at some point, please let it be there for them when they need it.
